

# Firewall Entity Relationship (E-R) Diagram

Version 2.0 | May 2020

Notes:

Since IP Addresses are being collected, a privacy policy & user agreement should be written and added to website. Additionally, **are we required to store them in hashes for security/privacy purposes?**

Have\_Votes.client\_name and Searches.client\_name are to store the name value the user enters when sitting down at the kiosk. For retroactive votes, (e.g. from the website) we would need to prompt website visitors to enter a name in order to make Have\_Ratings.user be 'not null'.

**\*Not Null**
